Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3653

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 2 through 13 are rejected under 35 U.S.C. 102(e) as being anticipated by Pang et al (US Patent No. 6060022, cited by applicant).

Pang et al teach a carrier handling system for an assay testing diagnostic analyzer comprising: a loading bay for receiving and holding a plurality of carriers (element 16); an identification device configured for identifying an identifying feature associated with the carriers to determine the type of contents loaded on each carrier (see column 8 lines 11-19 and column 16 lines 57-64); and a transporter (element 700) configured for transporting the carriers from the loading bay to a first (1200) and second location (2000) depending on the determined type of contents on each carrier for performing a diagnostic process using the contents, the transporter having random access to the plurality of carriers in the loading bay (see column 11 lines 39-47).

3. Claims 26 through 36 are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David H. Bollinger whose telephone number is 571-272-
